From line 4-8, I had a similar way of representing my thoughts externally, through listing the 4 gardeners and identifying the colors I knew they had, and the colors they could have.

+

+

+

The placement of some colors before/after the options in parentheses seems like it has meaning

+

I am assuming that the colors before the parentheses are concrete answers, the ones in parentheses are the options she is considering, and the colors after are her current guesses

+

Why is Mr Yellow repeated?

+

It is interesting that these rules for arrangement are placed at the bottom. It seems more

+

like visually organizing thoughts and less like a a

+

I hope so

and I think if you had the time to finish it would have been very explicit where your final answers were and such

lol YES

A+

very user friendly

It made sense to me!!

I forgot that we were going to be able to look at each others things, and i didnt make it user friendly lol

im glad you could figure out my thought process though and method of keeping track of things

lol yeah

agreed, I would also like to see a side by side because I can't remember my answers haha

which you pointed out

there was a similar method in place though

i wasnt done lol

:{

a few more minutes would have helped

I know we had the same answer for mr. blue

I think i was stopped as i was changing my answer for mr. green

WHICH ONE IS IT

which you pointed out

there was a similar method in place though

i wasnt done lol
